

DigiFlex Transfer

DigiFlex Transfer is a DTF or Direct to Film digital transfer process, used for branding apparel and fabrics.

BEST FOR

Tees, hoodies, apparel, bags and fabric items needing full-colour, personalised or variable-data artwork

LEAD TIME

Can be shipped straight after being printed

COLOURS

Full colour digital transfer. Metallic and neon/fluorescent colours cannot be reproduced.

ARTWORK NEEDED

Vector or bitmap at 300DPI at actual print size. Fonts should be converted to outlines/objects. Minimum detail 1mm.

AVAILABLE FOR

Apparel Bags & Totes Headwear

ADVANTAGES

- More economical for short runs
- Ideal for personalisation and variable data, including names and numbering
- Eco-friendly water-based inks
- Durable, flexible branding for apparel that is machine washable
- Efficient self-weeding technology
- Only one set up charge is required regardless of the number of print colours
- Can be shipped straight after being printed

LIMITATIONS

- Some colours cannot be reproduced including metallic and neon/fluorescent colours
- Minimum detail advised at 1mm
