

Imitation Etch

Imitation etch uses a special ink to produce an etch-like effect on glass products via pad or screen print.

BEST FOR

Glassware, drinkware and curved or uneven glass products needing an etched look

LEAD TIME

Requires a curing period before the product can be shipped

COLOURS

Single tone - frosted etch-like finish

ARTWORK NEEDED

Vector editable artwork required. Fonts should be converted to outlines/objects.

AVAILABLE FOR

Drinkware Business Items Promotional Items

ADVANTAGES

- Much more affordable than real etching
- Can brand curved or uneven products
- Produces a subtle finish with a higher perceived value that looks like etching

LIMITATIONS

- Halftones cannot be consistently reproduced
- The size of branding areas is limited on curved surfaces
- Requires a curing period before the product can be shipped
- Unable to print variable data
