

Hot Stamping

A printing method that creates an indented design on the product surface using a heated custom metal plate. This plate is pressed firmly onto the product surface, leaving a permanent impression of the artwork. It's often used on materials like wood.

BEST FOR

Wooden products, natural materials, giftware and premium packaging

COLOURS

Single tone - the natural impression of the heated plate on the substrate

LEAD TIME

Can be shipped as soon as heat pressing is finished

ARTWORK NEEDED

Vector artwork required. Fonts should be converted to outlines/objects. Minimum line thickness 0.4mm.

AVAILABLE FOR

Business Items / Personal Products / Gift Packs

ADVANTAGES

- Higher perceived value than other forms of branding
- The branding becomes part of the product and is permanent
- The product can be shipped as soon as heat pressing is finished
- Certain products can produce a two-tone, contrasting finish

LIMITATIONS

- Unable to print variable data such as individual naming
- Large block artwork can produce an inconsistent print result
- Minimum line thickness: 0.4mm
