

Laser Engraving

Laser engraving is a permanent branding process that engraves artwork into the surface of the product using a laser. Different materials produce different engraving finishes, so pre-production samples are recommended to avoid uncertainty.

BEST FOR

Metal pens, stainless drinkware, bamboo, cork, leather and products needing a permanent engraved finish

COLOURS

Single tone - the natural colour of the exposed substrate

LEAD TIME

7-9 working days; product can be shipped straight away after engraving

ARTWORK NEEDED

Editable vector artwork required. Fonts should be converted to outlines/objects. Gradients cannot be reproduced.

AVAILABLE FOR

Drinkware / Tech & Power / Business Items / Outdoor & Leisure / Personal Products

ADVANTAGES

- Higher perceived value than other forms of branding
- The branding becomes part of the surface and is permanent
- Large branding areas available on curved products
- Variable data including individual names is available on select products
- The product can be shipped straight away after being engraved

LIMITATIONS

- Fine detail can be lost on smaller products like pens
