

DigiFlex Transfer

DigiFlex Transfer is a DTF or Direct to Film digital transfer process, used for branding apparel and fabrics.

BEST FOR

Tees, hoodies, apparel, bags and fabric items needing full-colour, personalised or variable-data artwork

COLOURS

Full colour digital transfer. Metallic and neon/fluorescent colours cannot be reproduced.

LEAD TIME

Can be shipped straight after being printed

ARTWORK NEEDED

Vector or bitmap at 300DPI at actual print size. Fonts should be converted to outlines/objects. Minimum detail 1mm.

AVAILABLE FOR

Apparel / Bags & Totes / Headwear

ADVANTAGES

- More economical for short runs
- Ideal for personalisation and variable data, including names and numbering
- Eco-friendly water-based inks
- Durable, flexible branding for apparel that is machine washable
- Efficient self-weeding technology
- Only one set up charge is required regardless of the number of print colours
- Can be shipped straight after being printed

LIMITATIONS

- Some colours cannot be reproduced including metallic and neon/fluorescent colours
- Minimum detail advised at 1mm
