

Prism Digital Print

A UV-DTF (Direct to Film) process using CMYK + White + Varnish. UV inks print directly onto film, are cured by UV light, laminated and applied directly to the object like a sticker - eliminating the need for heat presses or powders. The result is a vibrant, durable and high-resolution logo with a gloss finish.

BEST FOR

Hard surface products, personalisation, variable data including names and numbering

COLOURS

Full colour with white underbase and gloss varnish

LEAD TIME

Can be shipped straight after printing

ARTWORK NEEDED

Vector or bitmap artwork accepted. Supplied bitmaps must be higher than 300DPI at actual print size. Fonts should be converted to outlines/objects.

AVAILABLE FOR

Drinkware / Promotional Items / Gift Packs

ADVANTAGES

- Produces vivid, full colour print with a gloss finish
- Long-lasting and resistant to scratching and fading
- Can be applied to most hard surfaces
- No need for heat presses or screens
- Ideal for personalisation and variable data, including names and numbering
- Efficient self-weeding technology
- Only one set up charge is required regardless of the number of print colours
- Can be shipped straight after printing

LIMITATIONS

- Not suitable for soft or flexible products
- Some colours cannot be reproduced including metallic and neon/fluorescent colours
- Minimum detail advised at 0.8mm
- Not suitable for designs with gradients that fade out to a transparency
