

Resin Coated Finish

A CMYK branding process produced by printing artwork onto a vinyl material with strong adhesive on the reverse. The branded area is then coated with a crystal-clear resin. Once dry, the finished decal is applied to the product and the adhesive forms a permanent bond.

**BEST FOR**

Keyrings, metal products and items needing a vivid full-colour image with a 3D domed effect

COLOURS

Full colour CMYK - white, metallic gold, silver and neon colours cannot be printed

LEAD TIME

The resin needs to be cured for one day before shipping the product

ARTWORK NEEDED

Vector or bitmap artwork accepted. Supplied bitmaps must be higher than 300DPI at actual print size. A 3mm bleed must be added if the artwork bleeds off the product.

AVAILABLE FOR

Promotional Items / Business Items / Personal Products

ADVANTAGES

- Ideal for producing vivid full colour images as well as closely matched spot colour branding
- Produces a stunning 3D effect that elevates the perceived value of a product
- Variable data including individual names is available on select products
- Edge-to-edge branding can be achieved on the resin coated area
- Only one set up charge is required regardless of the number of print colours

LIMITATIONS

- Larger print areas can be more expensive
- White, metallic gold, silver and neon colours cannot be printed
- The resin needs to be cured for one day before shipping the product
